Purpose: Show connections for Legacy LCD controller kit components found in #6558 controller kit. This kit is for older screens found in CNC10 and most CNC11 non touch screens. Some CNC10 15inch panels may not be compatible. The LCD panel will need to accept the tan flat connector below.

1. Overview
2. Button Ribbon Connection. Notice there is unconnected pin. Ribbon cable is connected closest to VGA cable side.
3. Button Board: Notice the ribbon cable connection is completely filled. Only one way this will go.
